

Features

- 24x7x365 Remote Access to Your Restaurant's Information
- Customer Marketing: Gift and Loyalty Programs
- Centralized Menu Management
- Employee Management: Track and Manage Labor Costs
- Detailed Business Reporting to Easily and Remotely Monitor and Manage Your Restaurant

Maintenance Free

pcAmerica can host and manage your data, eliminating the need for you to manage your own expensive servers and network.

Restaurant Pro Express™

The existing software at your restaurants sends data to the web portal so you can work from a remote location.

The pcAmerica Web Portal

Web-based Management System for Independent Restaurants

The pcAmerica Web Portal

is an Internet-based system that retrieves data from Restaurant Pro Express™ allowing users to run reports, change prices, create purchase orders, manage employee labor and perform several other back-office tasks from a web browser on any computer with Internet access. The pcAmerica Web Portal is an ASP (Application Service Provider) based system that works with your existing POS system making it the perfect solution for restaurants that need to easily monitor and manage their business from home or remote location.

How Can a Restaurant Benefit from a Web-Based Management System?

The pcAmerica Web Portal is a web-based suite of reporting, inventory, employee, labor and management tools that is accessible from any computer with Internet access. The secure standards and modern technology employed by the pcAmerica Web Portal introduce the following benefits to your restaurant:

- Web-based interface allows you to access your restaurant's information from anywhere at anytime
- Scalable for any number of restaurants of any size and location
- Automated, off-site data retention of your restaurants' crucial data
- No expensive servers and software to maintain. System management performed 100% by pcAmerica
- Works with any always-on Internet connection such as cable or DSL
- The restaurants continue to function at 100% even if the Internet connection is down

The pcAmerica Web Portal

Web-based Management System for Independent Restaurants

→ Simple, Easy & Accessible

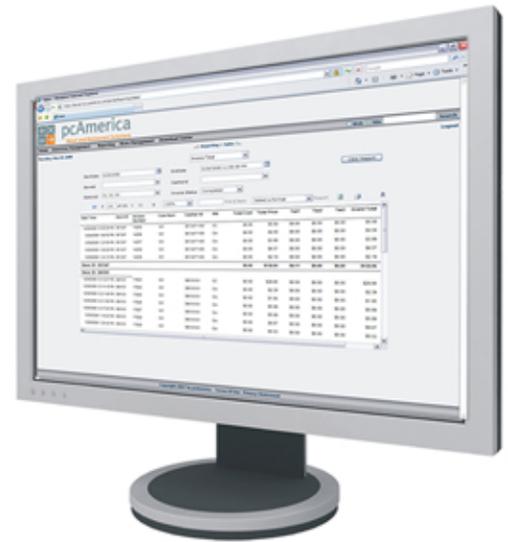

The pcAmerica Web Portal is hosted and maintained by pcAmerica. It is easy to activate, learn and use and information can be securely accessed from any computer with Internet access.

→ Pricing*

Our web-based management system pricing is module based. Available modules include:

- Reporting and Data Retention \$20
- Inventory Management \$10
- Interstore Transfer \$10
- Employee Management with Security Permissions \$10

*Sign-up fees apply. Pricing is per store per month with a 12 month pre-paid contract.

→ 24x7x365 Access to Your Restaurant's Information

The pcAmerica Web Portal is an Internet-based system that is accessible from any computer at any location that has Internet access. It is hosted and maintained by pcAmerica, which frees you from the hassle and costs of maintaining your own Internet server. Access your restaurant's information 24x7x365 by logging in with your user name and password.

→ Centralized Menu Management

The pcAmerica Web Portal allows you to remotely manage your menu, inventory and ingredients. You can add new menu items, configure specials such as happy hour pricing and delete items no longer on your menu. With the pcAmerica Web Portal, you can maintain lists of vendors, inventory and ingredient pricing, generate purchase orders, and change the tax rates for specific items. You can also configure printer and kitchen video routing from any computer that has an Internet connection as well as change prices, sales pricing and change item properties remotely.

→ Employee Management: Track and Manage Labor Costs from a Remote Location

The pcAmerica Web Portal allows you to store employee records and view labor schedules away from the store to ensure the most efficient return on your labor. You can create or modify employee records and security settings. In addition you can remotely run detailed business reports like employee hours, wages, commissions, and payroll. You can also print labor schedule reports and configure your point of sale system to allow only scheduled workers to clock in.

→ Detailed Business Reporting: Easily Monitor and Manage Your Restaurant Remotely

The pcAmerica Web Portal Reporting delivers crucial numbers and data that you need to efficiently run your restaurant no matter where you are. There are a variety of reports including sales and profits reports, product mix reports, inventory activity reports, and employee performance and labor statistics.
